

ADITYA RAVAL

Cyber Security Student

adityaraval.cyber@gmail.com • www.linkedin.com/in/adityaraval-cyber • <https://www.adityaraval.in> • Vadodara, Gujarat

Summary

I am a BCA Cyber Security student at Sigma University with a strong interest in ethical hacking, OSINT, networking, and cybersecurity.

Currently, I am learning Kali Linux, Nmap, reconnaissance techniques, and Python while building practical cybersecurity skills through hands-on learning and continuous improvement.

My goal is to develop strong foundations in both offensive and defensive security while maintaining high ethical standards and a responsible security mindset.

Skills

Kali Linux • Nmap • HTML/CSS • Networking Fundamentals • Python • Nmap • Cybersecurity Fundamental • OSINT

Projects

Password Strength Checker | GitHub

- Developed an interactive password strength checker web application using HTML, CSS, and JavaScript.
- Implemented real-time password analysis based on password length, uppercase/lowercase letters, numbers, and special characters.
- Designed a responsive and user-friendly interface compatible with desktop and mobile devices.
- Improved understanding of password security principles and client-side validation techniques.
- Technologies used: HTML5, CSS3, JavaScript.
